All,

By the way, everyone should take a look at this.

New Jersey just released their new recommended MCL for PFOA in drinking water.

14 ng/L.

This is a great document that summarizes the state of the science with regard to PFOA right now.

I have the feeling we're going to find lots of places with PFOA levels above 14 ng/L.

Thank you,

Andy

Subject: Re: Conference call?

Hi all,

How about Thursday, Sept 15, at 8:30 then? Later works just fine too, but we need to be done by 11:00 as Dr. Weavers has a meeting then.

Thanks,
Jason

Jason,

Yes – I'm free on Thursday morning.

You may find you have to cover a lot of territory to find the edge.

It will be interesting.

Thank you very much,

Andy.

Subject: Conference call?

Hi all,

What do you think about a conference call next week? Dr. Weavers let me know she's available

Thu Sep 15 8:30-12:00

So any time in that range would work for us.

I would like to plan another sample trip to define the boundaries of C8 contamination within and beyond the Little Hocking watershed - so casting a very wide net. I'd also like to confirm the results from the last trip, as I suspect the weather played a role in elevating those numbers.

Cheers,

Jason
